

National mirroring and participation in the European (ECISS) and International (ISO) work on standards for:

- Tubes
 - welded
 - seamless
 - for pressure purposes
 - for general purposes
 - of structural steels
 - of fine grain steels
 - of steels with specific low temperature properties
 - of stainless and creep-resistant steels
 - of steels for quenching and tempering
- Hollow sections
 - hot-finished
 - cold formed
- Steel pipes for pipeline transportation systems
- Precision tubes
- Steel tubes – Dimensions and tolerances
- Non-destructive testing
